16th FSC RE-AUDIT

CONGRATULATIONS ON ANOTHER SUCCESSFUL FSC AUDIT

I am pleased to advise the we have successfully passed our 2017 FSC audit.

This result is especially pleasing giving the corrective actions we received at the 2016 audit and demonstrates the work and effort that has gone in right through our business to make the required improvements.

The auditor visited Mohaka, Gwavas and Tangoio forests, and spoke with people across our harvesting, forestry and roading operations to ensure that what we say we do, we actually do. The feedback we had is extremely positive and reflects on the competence and professionalism of our workforce.

FSC certification is a critical part of our business and underpins many of the management philosophies, systems and processes that make our operations sustainable in the long term.

Thank you all for your contribution to another successful FSC audit.
