LOAD SECURITY

Due to a recent near miss, please make sure that all your oil and fuel containers are securely placed on the back of your vehicle as this will avoid them blowing off onto the road side. A motorbike was travelling on the Napier / Taihape Road and saw 3 containers on the road side between Sherenden school and Kaweka forest HQ's, which he picked up.

Empty fuel and oil containers should be placed on the inside of your vehicles, or at least tied down securely. There have been fatalities associated with oil spills leaking onto the road from these containers in recent times so think of your fellow road users.

Please remember to be a tidy kiwi and take your rubbish home from the forest each day.
