TIPS FOR DRIVERS

CORNERING– Slow down in your approach to corners and accelerate out of the corner to pull the trailer and do not let the load push you. Remember to brake on the straight before it's too late and keep it 10km/h below the advisory speed through the corner.

NARROW ROADS – If travelling on a narrow stretch of road be aware of your position and when and where it is safe to do so allow for loaded trucks to have the “Right of Way”.

KEEP HYDRATED – With the days warming up it is important to keep the water intake up to have your mind and body operating as it should.

EMERGENCY CALLS – Please make sure you have the latest “Emergency Procedure” sticker in your cab and understand the procedure, so you know what to do.

CHANGE OF VEHICLE – When you change from one vehicle to another make sure you give yourself the time to become familiar with the vehicle and know that every vehicle is different with its own traits to be aware of.

SUN STRIKE – Be cautious of the early morning and the evening sun position and if blinded by the sun, slow down or stop until you can see clearly.

HOLIDAY TRAFFIC – With the weather becoming better and the holidays approaching be aware of the increase in traffic on the roads and the number of children that will be out and about.

EMERGENCY PROCEDURE
