

HEALTH & SAFETY AWARENESS

DON'T DRIVE TO THE RT

Too many drivers on our forest roads are calling up on the radio and when they get no response - assume they have the road to themselves and drive accordingly.

This can be the vehicle version of "Russian Roulette"!!!

- R/T communication should only assist in road safety.
- Always drive to the road conditions.
- The maximum speed on Pan Pac forest roads is 50 km/h.
- Remain alert.

Vehicles may be on another channel or not have an R/T at all.

Remember always drive defensively and expect to meet other vehicles.

"R/T's should never alter the way you drive a vehicle"
