

HEALTH & SAFETY AWARENESS

EXPECT THE UNEXPECTED

Always expect the unexpected when driving. That way, you'll never be surprised and you'll always be in control. Watch for other drivers making sudden moves. Keep alert for pedestrians, cyclists, and animals darting out in front of you. Always be prepared to expect the unexpected around the next bend.

Think about the way you drive. Do you always use professional driving techniques? Ask others to talk about situations they have seen and the professional driving techniques they use and learn from them.

Tips:

- Know everything going on around you.
- Always look well ahead down the road.
- Be aware of who's in front of you, beside you and behind you at all times.
- Think of the what if.
