|---|---|
| Forest: _____ Date _____ | Stand: _____ Ageclass: _____ |
| Area: _____ (ha) | Crop Stocking: _____ (sph) |
| Co-ordinator: _____ (sign) | Row Spacing: _____ (m) |
| Contractor: _____ (sign) | Tree Spacing Within Rows: _____ (m) |
| Within Stands | Non Stocked Areas (Outside stands) |
| Treat all regen. Y / N | Treat all regen within the following areas: |
| Treat all regen within 1 m around crop tree. Y / N | Outside stand edge Y / N |
| | Riparian strip Y / N |
| | Forest boundary Y / N |
| | Power line strip Y / N |
| | Other: _____ |
| Method: Herbicide | |
| Target Species: Radiata / D. fir/ Contorta / Other _____ | |
| Additional requirements: (restrictions, sensitive boundaries, trial sites, hazard form) | |

OBJECTIVE:

To achieve a planted crop tree that is free of competition from regen trees. Regen treatment may also be required in non stocked areas.

METHOD ~ With In Stands

Identify the direction of the planting line and then identify the crop trees within the line and spray all the regen trees except, where a regen tree (*P.radiata only*) is able to fill the space of a dead or missing crop tree. The replacement tree must be the biggest and straightest tree situated within 1.0 m radius of the tree row and no closer than 1.0 m to another crop tree.

QUALITY:

Spray minimal area to kill tree with appropriate herbicide. (Rates: Answer 20 g per 15 litres, Roundup 1% solution + Pulse).

GENERAL:

Permanent Sample Plots or trials may occur within your working block/s. These restricted areas can be identified by yellow paint or metal tags or warning tape. **Do not enter these areas** without gaining permission from your Pan Pac Forests' co-ordinator.

Contractors are responsible for ensuring all employees understand and follow this prescription and the requirements of the following documents:

- Pan Pac Forest Products – Forest Operations Handbook.
- OSH Safety code of Bush Undertakings Part 1 – Forest Establishment and Silviculture.
- FIT Guidelines.
- Pan Pac Forest Products Forest Environmental Guidelines.
- Pan Pac Forest Products Pre-operational Hazard Identification.
